

DEPARTMENT OF

# ANIMAL AND POULTRY SCIENCES

The **animal and poultry sciences** program will provide you with a strong foundation in biological sciences coupled with practical hands-on application working with diverse species. Experiential learning along with science-based coursework will prepare you for a variety of career paths. Recent graduates have gone on to become veterinarians, animal specialists, physicians, zoo animal specialists, pharmacists, equitation instructors, Extension agents, scientists, nutritionists, animal production supervisors, farm managers, K-12 teachers, USDA inspectors, and pharmaceutical representatives.

## *FIND YOUR FOCUS*

**Pre-vet** – Prepare yourself for post-graduate education in veterinary or allopathic medicine, pharmacology, Extension, science, nutrition, animal production, farm management, and more.

**Science** – If your interests include nutrition, physiology, genetics, behavior, biotechnology, or food safety, this focus will provide you with the research and scientific skills you will need to succeed.

**Production-Business** – Prepare yourself for a career in production management, Extension, agricultural education, agribusiness, feed, or pharmaceutical sales.

Couple your focus with an emphasis in companion/laboratory animal, equine, livestock, or poultry management.
